AARDENBURG

KAPPA M

A PERFECT PLANT OR SEEDBED MADE EASY

Adjustability and reliability. Designed for growers and farmers with precious seeds and small plants where a well-layered structure with a uniform top layer is of paramount importance. The finely tuned combination of housing shape equipped with a fine mesh screen and multiple tiller blades, guarantees a uniformly textured seedbed where present stones are buried deep at the bottom of the seedbed. With the help of the highly adjustable crumbling roller, the surface texture can be further optimised to meet your specific requirements. Ideal for both small- and large-scale growers and farmers, for creating optimal seed and planting beds, both in the field and in greenhouses.

1. Protected

Enjoy a longer lasting machine thanks to the shear bolt overload protected PTO

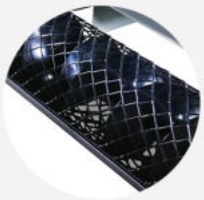

2. Side-shift

Simply adjust placement mechanically to till near walls, fences, ditches or irrigation

3. Crumbly

Sow delicate seeds and plants in perfect crumbly soil thank to the fine grating screen and crumbling roller

4. Easy

Easily maintain, inspect and clean the Kappa M thanks to the integrated door

5. (Im)proved

Ease of mind with the special improved and proven Aardenburg design after intensive field testing and an extensive quality check
